

BELT PULLING WINCHES

GENERAL INFORMATION

The DYMOT range of belt pulling winches have been specifically designed and developed to meet our client's need to install conveyor belts over extended distances. These winches are based on our take-up winch range with the exception that it can accommodate longer pull and operate at faster speeds.

The belt pulling winch can be operated either DOL or with a VFD. The winch offers an electromagnetic brake for the smaller types and thruster operated drum brakes for the larger types

SPECIFICATIONS
